Minor Wording Changes in the Course Objectives for BIOC 112

There are three course objectives for BIOC 112, Metabolism, for which the course director, Charles Barlow, suggests changes to improve clarity and mapping to session objectives. The changes are:

OLD 8. To explain how certain medicines and drugs impinge upon metabolic pathways.
NEW 8. To explain how certain medicines, drugs and treatments impinge upon metabolic pathways.

OLD 12. To connect specific symptoms in clinical case presentations to metabolic disorders.
NEW 12. To connect specific symptoms in clinical cases to metabolic disorders.

OLD 13. To critically evaluate and discuss the primary literature in small literature discussion groups.
NEW 13. To critically evaluate and discuss the primary literature in discussion groups.
