More Examples of Innovative Network and Statistical Methods Research

Underscoring the importance of developing cutting edge network analysis and statistical methods to help solve problems in healthcare, O'Malley and his colleagues recently had two additional papers accepted for publication, which can be viewed here: <u>Constrained Community Detection in Social Networks</u> (with Weston Viles) and <u>GRANDPA: GeneRAtive Network sampling using</u> <u>Degree and Property Augmentation applied to the analysis of partially</u> confidential healthcare networks (led by Carly Bobak).
