

D-H AlertUs – Mac OS X installation

1. Download: alertus-desktop-osx-2.10.01.1727_Mac_Build.dmg
2. Double click on alertus-desktop-osx-2.10.01.1727_Mac_Build.dmg to open the installer window.

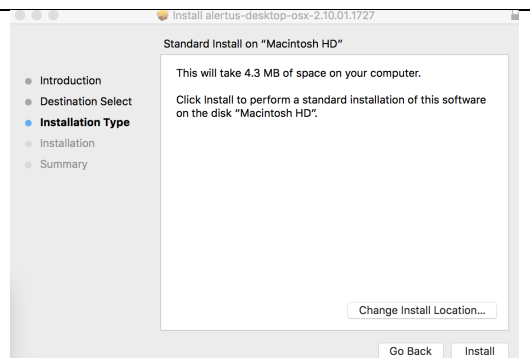

3. Double-click on alertus-desktop-osx-2.10.01.1727.pkg

4. Click the 'Continue' button on the next window

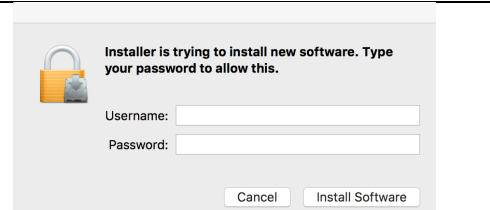

5. Click the 'Install' button on the next window

6. Install Software

Enter your Mac username
Enter the password for your Mac username
Click on the 'Install Software' button to install the software.

If the installation was successful, you will get a message indicating 'The installation was successful'

7. Restart your Mac to enable the AlertUs software.

After you restart your Mac you should see the AlertUs icon in your menubar.

- Yellow means it is connected and will receive alerts.
- Red means it did not find the AlertUs server and will not receive alerts.
- Note: your computer has to be on the D-H production network to get alerts.
