I. Description of Research:

Describe the research, addressing the purpose, relevant background information, objectives and hypotheses, and data analysis plan, including qualitative and quantitative methods.

II. Data Collection Methods:

Indicate all sources from which you will be obtaining the data and/or specimens you are reviewing and describe your data collection plan. Please be as specific as possible.

- **Source of Data:** Please check all that apply.

  ☐ D-H Analytics Institute (formerly, Data Warehouse)

  ☐ D-H electronic medical record (eD-H)

  ☐ D-H Pathology Department / Specimens

  ☐ Existing CPHS-approved Registry or Database. Please provide the CPHS study number and upload any required agreements or documentation of permission from the manager of the database. CPHS #: _____

  ☐ Other: Please describe:

- **Data Collection:** Describe the methods you will use to collect the data. If you checked "D-H electronic medical record (eD-H)" above, describe why chart review in eD-H is necessary.

- **Data Elements:** Specifically list each data field and/or specimens necessary for this project. Create data collection form.
