

## CT Guided Procedures

### Approving the procedure?

- Create a Notes Only Encounter
- H&P Note- Use SmartPhrase “CTPRE”
- Make sure to fill out “The Plan” **before** starting the Pre-Procedure note

The screenshot shows the EHR interface for a patient encounter titled "Radiology - 2/19/2020 visit for IR MEDIP...". The "Pre-Procedure" tab is active, displaying "No FYI Flags" and a list of reports including "Cons Pending ent". The "H & P Note" section is highlighted, with buttons for "Create Note", "See All Notes", and "Refresh". The left sidebar shows the "Radiology" menu, and the "H & P Note" option is highlighted in red. The right pane shows the "Edit Note" window with the text ".CTPRE" entered.

### Day before the Procedure?

- Open the scheduled Encounter
- Find the H&P Note created when procedure was approved
- Click **Add Interval** and use SmartPhrase “CTSEDATION1”

The screenshot shows the EHR interface for the same patient encounter. The "H&P Interval Notes" section is active, displaying "Notes attached to current encounter" and a list of notes. The "Add Interval" button is highlighted in red. The left sidebar shows the "H&P Interval Notes" option highlighted in red. The right pane shows the "Edit Note" window with the text ".CTSEDATION1" entered.
