

Student Interest Groups Utilizing Sim

There are costs associated with space and borrowing equipment from the PSTC. Student groups can apply for funding through student government if they wish to host an event that needs equipment.

To cut down on space costs we recommend borrowing equipment. If they need space, Borwell has been utilized which I can also help reserve, or they can find another space at DH on their own.

Students should reach out to Charlotte Beaton, Charlotte.M.Beaton@dartmouth.edu to inquire about their needs and so she can provide them with a quote for applying for funding.

Ideally 6 weeks is needed for planning (it can be done in less time, but students must be very responsive and act quickly).

They can work on preparing equipment needs prior to an event, but they cannot confirm or allow an event to happen without proof of funding before the event. Proof includes the chart string for where the funds will come from in an email from whoever in student government is approving those funds.
