Weekly Newsletter

Feb 5, 2026

The Student Research Office is actively supporting medical students throughout their research journey, serving as a central resource to help navigate onboarding requirements and connect with opportunities across departments. The office regularly shares active research projects and offers guidance on how to get involved.

Students are strongly encouraged to visit the office at **Remsen 230** for any research-related information and to begin their research journey.

Upcoming event

Co-curricular interdisciplinary seminars

When: Mar 5th, 2026 | 7:00 AM – 8:00 AM at Chilcott Auditorium

Topic – How to Write a Grant by Dr. Tim Gardner

Career Advising Pulse Check - Planning for M1 Summer & Summer Research Session

When : Feb/9/2026 - 12 pm - 1:30 pm

Where : Kellogg 200

2026 Richard W. Dow Student Research Scholarship in Surgery (For M1)

The Dow Student Scholar Program provides Geisel students with the opportunity to engage in mentored research with a surgery faculty member during the break between **Year 1 and Year 2**.

Interested students should first contact a surgery faculty mentor to discuss a project, then submit a formal application by **February 27, 2026** to **DOSResearch@hitchcock.org**.

Further details, including program information and available projects, can be found at the link below.

<https://geiselmed.dartmouth.edu/student-research/2026-richard-w-dow-student-research-scholarship-in-surgery/>

When : Feb/9/2026 - 12 pm - 1:30 pm

Where : Kellogg 200

Study on curricular threads : Looking for Participants

Dr. Lyons and the research team invite Class of 2027 and 2028 Geisel medical students to participate in a 15-minute virtual interview exploring student experiences with curricular threads, with a focus on **Anatomy & Embryology**. Participation is voluntary, confidential, requires no preparation, and includes entry into a gift card raffle.

Sign up here (please use the correct link for your class):

- Class of 2028 (M2s): <https://calendly.com/ian-r-beals-med-dartmouth/a-e-ct-interview?month=2026-02>

Call for abstract submissions for the 14th Annual Surgical Trainees Advancing Research Symposium (STARS)

Deadline: February 9th , 2026, via email to Parker.R.Fairfield@hitchcock.org

Call for Abstracts

Eligibility: Department of Surgery resident or fellow. Medical students with a mentor in the Department of Surgery may also apply.

Type of Research: Basic science, translational, or outcomes.

Details: Original work. (Abstracts presented or accepted at a regional or national meeting in Fall 2025 or Winter 2026, that have not been published as a full paper are eligible.)

Format: Introduction, Methods, Results, and Conclusion. Abstracts are limited to 300 words. One table or figure is acceptable.

Deadline: February 9th, 2026, via email to Parker.R.Fairfield@hitchcock.org

Why be a Star?
Fame. Glory. Cash.
Prizes Supported by the Department Surgery

The 14th Annual Surgical Trainees Advancing Research Symposium (STARS)

Keynote Speaker:

Keith D. Lillemoe, MD, FACS, MAMSE
Surgeon-in-Chief, Emeritus
Massachusetts General Hospital
W. Gerald Austen Professor of Surgery, Emeritus
Harvard Medical School

When:

Thursday, April 9th, 2026, 5:30-7:00 PM
& Friday, April 10th, 2026, 7:00-8:30 AM

Dartmouth Radiology Summer Research Internship

Radiology Summer Research Internship

The deadline for the Radiology Summer Research Internship is now extended to: **February 28, 2026.**

Successful applications will be notified by: **March 31, 2026.**

Harvard Medical School Visiting Clerkship Scholars Program

Sponsored by the Office for Culture and Community Engagement (OCCE) at Harvard Medical School (HMS), the Visiting Clerkship Scholars Program (VCSP) provides an immersive experience for fourth-year and qualified third-year medical students who have demonstrated leadership, a commitment to service, and a passion for advancing equity in health care. Through immersive clinical experiences, mentorship, and programming focused on leadership development, community engagement, and career advancement, scholars will gain insights, needed tools and networks to help them thrive in academic medicine and become future leaders with a focus on health equity.

Benefits

- ◆ **Over 200 clerkship options** across the specialties, along with combined programs that provide students with experience at more than one Harvard-affiliate hospital during a single rotation
- ◆ **Mentorship and Networking** with faculty and residents across the Harvard-affiliate hospitals, including dinner with faculty, trainees and other VCSP scholars
- ◆ **Stipend** to support travel and housing
- ◆ **Lectures** focused on leadership skills, community engagement, careers in academic medicine, and advancing health equity.
- ◆ **Learning opportunities** about pursuing careers in academic medicine, research, advocacy and policy

Eligibility

- ◆ U.S. citizen or permanent resident.
- ◆ Full-time third- or fourth-year medical student in good standing at an LCME- or COCA- accredited medical school.
- ◆ Have completed all core clinical clerkships.
- ◆ Have passed USMLE Step 1 and either scheduled for or passed USMLE Step 2.
- ◆ Demonstrate a strong commitment to health equity, leadership, and service.

Application

- ◆ Complete the online VCSP application: bit.ly/3NpDzpi
- ◆ Upload your personal statement and CV
- ◆ Secure a letter of recommendation from a faculty member who can speak to your skills in a clinical setting, and your commitments to community and health equity
- ◆ Apply to your preferred clerkship through the VSLO application service. Elective courses are posted on the [HMS Registrar's Exchange Clerkship page](#) at bit.ly/3aGb83t
- ◆ **SUBMIT your completed application no later than March 15, 2026**

Important Notes

- ◆ While rotations are available year-round, the Visiting Clerkship Scholars Program is only offered June through October
- ◆ Carefully review the deadlines and notification dates for VSLO application. With the exception of candidates applying for the month of June, it will be the case that your application for the Scholars program will be due before the clerkship options for July – October are posted. If you are interested in the Scholars program, submit your application by the March 15 deadline and just note your clerkship area of interest. If selected as a Scholar, we will hold a place for you in the program until you find out if you have received a clerkship placement.
- ◆ Spots within the VCSP are limited and some applicants may be placed in a clerkship by the HMS registrar but not be accepted into the VCSP. In those cases, the applicant may still participate in their clerkship, but will not be able to participate in the VCSP program.

Participating Hospitals

- | | | |
|--|-------------------------------------|----------------------------|
| ◆ Beth Israel Deaconess Medical Center | ◆ Dana Farber Cancer Institute | ◆ McLean Hospital |
| ◆ Boston Children's Hospital | ◆ Joslin Diabetes Center | ◆ Mt. Auburn Hospital |
| ◆ Brigham and Women's Hospital | ◆ Massachusetts Eye & Ear Infirmary | ◆ Spaulding Rehab Hospital |
| ◆ Cambridge Health Alliance | ◆ Massachusetts General Hospital | ◆ VA Medical Center |

2026 CCI Applications Open

****Deadline to Apply: February 16, 2026****

<https://geiselmed.dartmouth.edu/students/programs/global-health-equity/cghe-application/>

What it is?

A funded, interdisciplinary internship that lets students partner with international or domestic sites to advance health-equity research, service, or advocacy work.

Key dates

- **Application deadline:** Feb 16, 2026 (Graduate Students - spring-term applicants – submit by Feb 1, 2026)
- **Internship start window:** June 15–Dec 15, 2026 (must begin at least 3 months after the application deadline of February 16, 2026)

Eligibility & Time Commitments

Funding

- 4 weeks – \$3,200
- 5-6 weeks – \$3,500
- 7-8 weeks – \$4,000

How to apply

Visit the application page for full requirements and the proposal template:

<https://geiselmed.dartmouth.edu/students/programs/global-health-equity/cghe-application/>

****PLEASE NOTE:** Not every destination is travel-eligible. Check [Dartmouth's Travel Exception](#) list for 'Graduate Students' to see which locations require an exception request. Even if an exception is granted, the list can change at any time - new countries or regions may be added at any time.**

HMS Visiting Research Internship Program

the Visiting Research Internship Program (VRIP) is an eight-week mentored, summer research program designed to enrich medical and dental students' interest in research and health-related careers, particularly clinical/translational research careers. VRIP is sponsored by Harvard Catalyst and OCCE.

Program Date : Monday, June 1 - Friday, July 24, 2026 (tentative)

More Information : <https://occe.hms.harvard.edu/paths-opportunity/visiting-research-internship-program>

2026 American Heart Association Institutional Award for Undergraduate Student Training

This is an institutional award, made to qualified institutions that can offer a meaningful research experience that supports the mission of the American Heart Association to undergraduate college students.

<https://professional.heart.org/en/research-programs/aha-funding-opportunities/institutional-award-for-undergraduate-student-training>

Supporting Research in Sudden Cardiac Arrest

The AHA is committed to supporting new research projects on Sudden Cardiac Arrest across all scientific disciplines (basic, clinical, and population) within any current AHA programs. No additional pre-proposal or proposal materials are necessary outside of individual AHA program criteria; awardees will be designated from the existing applicant pool within each program.

Cardiovascular Research Training Opportunities for Undergraduate Students – Summer 2026

The **Center for Cardiovascular Research (CCVR)** in the Abigail Wexner Research Institute at Nationwide Children's Hospital conducts innovative, mechanistic-based research to improve therapies and outcomes for infants and children with heart diseases and promote cardiovascular health in children and adults.

Undergraduate students enrolled in colleges and universities across the country interested in exploring careers in medicine, biomedical research and bioengineering in a cutting-edge research environment can experience and support CCVR research firsthand during a 10-week, paid summer research opportunity on the AWRI campus.

The application portal will open in mid-October and will accept applications until **February 6, 2026!**

Radiation Onc Medical Student Research Fellowship

Geisel medical students interested in pursuing a dedicated research year in Radiation Oncology are invited to apply for the Radiation Oncology Medical Student Research Fellowship. The fellowship provides a \$35,000 grant (including a \$32,000 stipend) and offers structured mentorship, research experience, and career development under the guidance of Dr. Charles R. Thomas, Jr., Chair of the Department of Radiation Oncology and Applied Sciences.

- Duration: 12 months maximum (10 minimum)
- Offered: medical student
- Faculty: Charles R. Thomas, Jr., MD

Student Spotlight

Colin McNamara , MD Class of 2027

Colin McNamara is a third-year medical student at Dartmouth Geisel School of Medicine. Colin is interested in radiation oncology, health services research, and medical education. Prior to medical school, Colin attended undergrad at the University of Chicago and nursing school at Emory University before working as a nurse practitioner at a rural Federally Qualified Health Center in northern Arizona. His familiarity with different practice environments and health professions informs an interest in understanding how patients interact with the healthcare system and how healthcare workers are trained.

During medical school, Colin has been engaged in several projects with the Department of Radiation Oncology and Applied Sciences. Colin's initial interest in radiation oncology developed while working with Dr. Deborah Bruner at Emory on projects related to changes in the vaginal microbiome and patient reported outcomes during radiotherapy. His primary project at Dartmouth has been studying the impact of residential segregation on access to radiation therapy with Dr. Nirav Kapadia, Dr. Andrew Loehrer, and Heather Carlos. Colin has also presented and published a survey on funding availability for visiting medical student electives in radiation oncology with Dr. Kapadia, Dr. Drew Bergman (Geisel 2024), and Alexys Gayne (MD/PhD student), and is starting a systematic review regarding surveillance of recurrent prostate cancer with negative PSMA PET with Dr. James Yu. Colin is also the Editor Coordinator for the Applied Radiation Oncology journal's Student Scan e-Newsletter, a quarterly

newsletter with input from an international cohort of medical students. Colin is also a contributor on a national survey of mentorship in radiation oncology with guidance from Dr. Charles Thomas.

Scholarly Manuscripts by Geisel Students

Geisel students continue to drive innovation through research, contributing to peer-reviewed publications across clinical medicine, global health, and more. Their scholarly work reflects a deep commitment to scientific inquiry and advancing patient care. Each year, our students co-author numerous manuscripts, showcasing their passion for discovery and academic excellence. <https://geiselmed.dartmouth.edu/student-research/research-papers-by-geisel-students/>

Students are requested to submit their published manuscripts to be archived in the Student Manuscript section of the website.

Comparative-Effectiveness Research/HTA

Evaluation of Diversity of Clinical Trials Informing Health Technology Assessments in the United States: A 5-Year Analysis of Institute for Clinical and Economic Review Assessments

Foluso Agboola, MBBS, MPH, Abigail C. Wright, PhD, MSc, Serina Herron-Smith, BA, Diya Mathur, BA, David Rind, MD, MSc

ABSTRACT

Objectives: This study aimed to evaluate the diversity of clinical trials informing assessments conducted by the Institute for Clinical and Economic Review.

Methods: This was a cross-sectional study of pivotal trials included in completed Institute for Clinical and Economic Review assessments over 5 years (2017-2021). Representation of racial/ethnic minority groups, females, and older adults was compared with the disease-specific and US population, using a relative representation cutoff of 0.8 for adequate representation.

Results: A total of 208 trials, evaluating 112 interventions for 31 unique conditions, were examined. Race/ethnicity data were inconsistently reported. The median participant-to-disease representative ratio (PDRR) for Blacks/African Americans (0.43 [interquartile range (IQR) 0.24-0.75]), American Indians/Alaska Natives (0.37 [IQR 0.09-0.77]), and Hispanics/Latinos (0.79 [IQR 0.30-1.22]) were below the adequate representation cutoff. In contrast, Whites (1.06 [IQR 0.92-1.2]), Asians (1.71 [IQR 0.50-3.75]), and Native Hawaiian/Other Pacific Islanders (1.61 [IQR 0.77-2.81]) were adequately represented. Findings were similar when compared with the US Census, except for Native Hawaiian/Pacific Islanders, which was substantially worse. Relative to all trials, a higher proportion of US-based trials adequately represented Blacks/African Americans (61% vs 23%, $P < .0001$) and Hispanics/Latinos (68% vs 50%; $P = .047$), but a lower proportion adequately represented Asians (15% vs 67%, $P < .0001$). Females were adequately represented in 74% of trials (PDRR: 1.02 [IQR 0.79-1.14]). Nevertheless, older adults were adequately represented in only 20% of trials (PDRR: 0.30 [IQR 0.13-0.64]).

Conclusions: The representation of racial/ethnic minorities and older adults was inadequate. Efforts are needed to enhance the diversity of clinical trials. Standardized and transparent evaluation of trial diversity should be part of the health technology assessment process.

Keywords: clinical trials, diversity, ethnicity, health technology assessment, older adults, race, sex.

VALUE HEALTH. 2023; 26(9):1345-1352

Introduction

There are concerns about the lack of diversity in clinical trial populations, which has implications for both generalizability and fairness, particularly because new therapies are regularly being introduced in the United States. In 1986, the National Institutes of Health established a policy encouraging researchers to include women and minorities in clinical research, and the US Congress made what had formerly been a policy into public law through a section in the National Institutes of Health Revitalization Act of 1993, as part of an effort to enhance the diversity of clinical trial populations. Similarly, over the last 3 decades, the US Food and Drug Administration (FDA) has created various guidelines for clinical trial sponsors to encourage diverse demographic enrollment.^{1,2} Nevertheless, evaluations of clinical trials that support drug and vaccine approvals over the last decade have found that

racial/ethnic minorities and women continue to be inadequately represented in clinical trials.³⁻¹⁰ Other research have also noted that specific demographic information, particularly race and ethnicity, are not adequately captured in clinical trials,¹¹ further masking the lack of diversity.¹²

As a health technology assessment (HTA) organization that provides evidence-based information on new therapies to help inform pricing, coverage decisions, and patient-centered policies, Institute for Clinical and Economic Review (ICER) focuses on many of the most important therapies coming into the market, often representing the newest technologies with the greatest benefits. Unlike the FDA, which has regulatory authority on the approval of new therapies, ICER's work is intended to help inform pricing, coverage decisions, and patient-centered policies on the use of these therapies. We believed that evaluating the representativeness in a sample of ICER reviews would inform the discussion on

GMSJ

GMSJ is a student-led publication dedicated to showcasing the research, insights, and perspectives of medical students. It offers a hands-on opportunity to gain experience in academic publishing, including research dissemination, peer review, and scholarly writing—valuable skills for future careers in academic medicine.

We look forward to reviewing your work and celebrating your contributions to scholarship at Dartmouth!

Read GMSJ's first editorial publication :

Designing and Launching a Student-Led Medical Journal: Structure and Early Implementation of the Graduate Medical Scholars Journal (GMSJ)

<https://gmscholars.com/index.php/gmsj/article/view/inauguralissueNo1>

The Geisel Medical Student Journal (GMSJ) is pleased to announce the publication of **Vol. 1, No. S1 (2025): Special Issue — 2025 Geisel Research Poster Night**.

This special issue highlights outstanding student research presented at 2025 year's Poster Night, showcasing innovative projects, scholarly excellence, and the depth of scientific inquiry within our community.
